## TECHNICAL SPECIFICATIONS

This pumping station is easy to use and compatible with bikes of all types. Its structure is light and robust. The pump and pressure gauge allow you to measure tyre pressure accurately. The station is equipped with a high-quality pump and a glycerine-filled pressure gauge that does not allow condensation to form, making it so that pressure can be read clearly.

### MAINTENANCE

Despite its exposure to atmospheric conditions, the station does not require any extraordinary maintenance work, due to the fact that it is made of aluminium and steel components. We recommend covering it in the event that it is not used in winter. Pump: we recommend lubricating the stem from time to time.
